Listing of Claims

1. (currently amended) An apparatus comprising:

a process chamber having a substantially vertical
chamber wall defining a chamber interior;

a showerhead provided in said process chamber and
having a lateral surface engaging said chamber wall; and

a plurality of exterior fasteners extending laterally
through said chamber wall and into said showerhead, with said
plurality of exterior fasteners structurally isolated from said
chamber interior.

2. (original) The apparatus of claim 1 wherein each of said
plurality of exterior fasteners comprises a fastener head and a
threaded shank extending from said fastener head, and wherein
said fastener head engages an exterior surface of said chamber
wall.

3. (original) The apparatus of claim 1 further comprising a
gas mix plate carried by said chamber wall above said
showerhead.

4. (original) The apparatus of claim 3 wherein each of said
plurality of exterior fasteners comprises a fastener head and a

Attorney Docket No.: 67,200-1133

threaded shank extending from said fastener head, and wherein said fastener head engages an exterior surface of said chamber wall.

5. (previously presented) The apparatus of claim 1 further comprising a confinement ring provided in said process chamber beneath said showerhead.

6. (original) The apparatus of claim 5 wherein each of said plurality of exterior fasteners comprises a fastener head and a threaded shank extending from said fastener head, and wherein said fastener head engages an exterior surface of said chamber wall.

7. (original) The apparatus of claim 5 further comprising a gas mix plate carried by said chamber wall above said showerhead.

8. (original) The apparatus of claim 7 wherein each of said plurality of exterior fasteners comprises a fastener head and a threaded shank extending from said fastener head, and wherein said fastener head engages an exterior surface of said chamber wall.

9. (withdrawn) An apparatus comprising:

a process chamber having a chamber wall;

Applicant: Yu-Lien Huang, et al.

Serial No.: 10/656,586

Attorney Docket No.: 67,200-1133

a showerhead provided in said process chamber;

a confine ring provided in said process chamber
beneath said showerhead; and

a plurality of embedded fasteners extending through
said confine ring and said showerhead and into said process
chamber, with each of said plurality of embedded fasteners
substantially embedded in said confine ring.

10. (withdrawn) The apparatus of claim 9 wherein each of
said plurality of embedded fasteners comprises a fastener head
and a threaded shank extending from said fastener head, and
wherein said fastener head is substantially flush with said
bottom surface of said confine ring.

11. (withdrawn) The apparatus of claim 9 wherein said
process chamber comprises a gas mix plate carried by said
chamber wall above said showerhead and wherein said plurality of
embedded fasteners is threaded into said gas mix plate.

12. (withdrawn) The apparatus of claim 11 wherein each of
said plurality of embedded fasteners comprises a fastener head
and a threaded shank extending from said fastener head, and
wherein said fastener head is substantially flush with said
bottom surface of said confine ring.

Applicant: Yu-Lien Huang, et al.

Serial No.: 10/656,586

Attorney Docket No.: 67,200-1133

13. (withdrawn) A method of mounting a showerhead in a process chamber having a chamber wall defining a chamber interior, comprising the steps of:

extending a plurality of fasteners into engagement with the showerhead and the process chamber; and

structurally isolating said plurality of fasteners from the chamber interior.

14. (withdrawn) The method of claim 13 wherein said extending a plurality of fasteners into engagement with the showerhead and the process chamber comprises the step of extending a plurality of exterior fasteners inwardly through the chamber wall and into the showerhead.

15. (withdrawn) The method of claim 13 wherein each of said plurality of fasteners comprises a fastener head and a threaded shank extending from said fastener head.

16. (withdrawn) The method of claim 15 wherein said extending a plurality of fasteners into engagement with the showerhead and the process chamber comprises the step of extending a plurality of exterior fasteners inwardly through the chamber wall and into the showerhead.

17. (withdrawn) The method of claim 13 wherein said

Attorney Docket No.: 67,200-1133

extending a plurality of fasteners into engagement with the showerhead and the process chamber comprises the step of extending a plurality of embedded fasteners through the showerhead and threading said plurality of embedded fasteners into the process chamber.

18. (withdrawn) The method of claim 17 wherein each of said plurality of fasteners comprises a fastener head and a threaded shank extending from said fastener head.

19. (withdrawn) The method of claim 14 wherein said structurally isolating said plurality of fasteners from the chamber interior comprises the step of abutting the showerhead against the chamber wall.

20. (withdrawn) The method of claim 17 wherein said structurally isolating said plurality of fasteners from the chamber interior comprises the step of embedding said plurality of embedded fasteners in a confine ring disposed in the chamber interior beneath the showerhead.
